

Search Projects

Find projects by multiple search criteria
Search for projects by specifying one or more criteria including - Neighborhood, Status, Project Type, and Project Manager.

Search Results

Search results are summarized (project name and description) in the Search Results panel and project locations marked on the map.

Zoom to Project

Zoom the map to the project location with the project marker hyperlink in the Search Results panel.

Project Detail Report

Project detail reports are available from the project name hyperlink in the Search Results panel. Assessor's parcel reports are also available from the parcel id hyperlink. The project detail report and Assessor's reports are also available from the project popup.

Project Summary Report

A project summary report (all projects meeting Criteria - summarized by project manager) is available at the top of the Search Results panel

Project Quick Pick

Find projects by name
Use Project Quick Pick to navigate directly to a project location by selecting the project name.

Project Popup

Additional project information and reports
Hover over the project marker on the map for access to additional project information and reports.

Board Memos

Links to Aerial and Planimetric Board Memos are available from the project popup.

Navigation Control

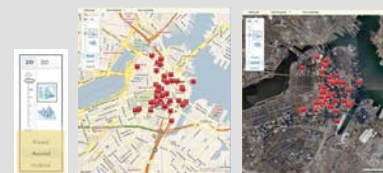

2D Navigation

Use the zoom slider (or mouse wheel) to zoom the map in or out. Click and drag (or use the arrow keys) to pan the map.

Map Views

Change the map view with the Road, Aerial, and Hybrid options.

Bird's Eye View

Switch the map view to an oblique perspective with the Birds Eye option. Click and drag on the image to pan. Change the angle of the perspective with the orientation control.

3D View

Switch the map view to 3D with the 3D option. Change your perspective with the view angle controls. Use the navigation compass to change rotation, tilt, or pitch.
